

## Practical Pool Management **PLUS**

*A Certification Course for Swimming Pool Operators*

**Practical Pool Management Plus** is a two-day program that offers an in-depth analysis of swimming pool and spa operations worldwide. Developed and taught by the author and editor of *The Complete Swimming Pool Reference* (2<sup>nd</sup> Edition), **Practical Pool Management Plus** moves beyond traditional calculations and mathematics to provide the pool operator or manager not only the basics of pool operations but also a comprehensive look at managing an aquatic facility. Certification is valid for five years. Persons already certified as Certified Pool Operators or Aquatic Facility Operators may challenge the certification exam.

***Why not take the pool operator course from the professionals who wrote the book?!***

DeRosa|Aquatic|Consulting

## Practical Pool Management **PLUS**

- ❖ Two-day certification course (16 hours)
- ❖ Fast-paced and affordable training
- ❖ Includes video footage not found in other programs
  - Swimming Pool Operations, A Framework for Action
  - Five Minute Scanning Strategy
  - Entrapment, Shallow Water Blackout
  - Safe Chemical Handling
- ❖ Integrated focus on water safety and risk management; reducing liability

## Pool Operator Training Reduces Pool Inspection Violations

Two studies have demonstrated that water quality is better at pools when the pool operators have successfully completed formal training programs in pool operations. ***Certification makes a difference!***

## Why Choose The PPM+ Program?

- ❖ Experienced and well-respected instructors
- ❖ Competitive pricing, including textbook
- ❖ Comprehensive training in operations **and** management, including standards of care
- ❖ Up-to-date discussion of local, national *and* international standards for swimming pool operators

## Meets Training Requirements for Pool Operators

*PPM+ is approved by state health departments*

Our PPM+ training program meets or exceeds pool operator training requirements in virtually every state. Certification is provided through **Aquatic Safety Research Group, LLC.**

## Help Meet Regulatory Requirements

*Pool operator training helps establish your knowledge of water chemistry, testing and pool operations.*

Even in states where pool operator certification is not mandated, there is often a requirement to have "knowledgeable" staff on the premises at all times the pool is open.

The Model Aquatic Health Code confirms that increased pool code violations have been linked to the lack of pool operator training. For this reason the code requires most public pools to make a "qualified operator" available on-site during all hours of operation.
